

## DRUMGRANGE VACANCY ADVERT

### GRADUATE ELECTRONICS ENGINEER

**LOCATION:** PORTLAND

#### JOB PURPOSE

As an electronics engineer working within a small team of skilled design engineers, to supply high quality products and systems to the Defence Industry. The successful candidate will be involved throughout the design lifecycle, from system requirements to innovative electronics design solutions, leading to successful customer acceptance within project timescales and budget.

**REPORTING TO:** CHIEF ELECTRONICS ENGINEER

#### ESSENTIAL SKILLS & REQUIREMENTS

- Degree educated or equivalent qualifications.
- Digital, analogue and embedded electronics design knowledge.
- Familiar with ECAD tools for circuit & PCB design.
- Able to multi-task and prioritise workload with a hands-on approach.
- Able to work with the internal and external stakeholders to develop solutions.
- Strong communication skills both written and oral.
- Able to obtain UK Security Clearance.

#### JOB RESPONSIBILITIES

- Design and Development of digital and analogue circuits.
- Design and Development of firmware sub-systems.
- Consideration of design for manufacture and test, to ensure smooth transitions to production.
- Systems integration or solutions, including fault finding.
